# REBELLION

**Dear Adventurer** Welcome to the winter 1996 edition of *The Adventurer*! This issue represents a couple of firsts, one second and a third. **Rebellion** is LucasArts' first strategy game for the *Star Wars* universe. The **LucasArts Archives Vol. II: The Star Wars Collection** is the second in a series of classic game compilations. **The Curse of Monkey Island** is the highly anticipated third installment of the hilarious *Monkey Island* game series. Oh, and by the way, this is my first issue as editor of *The Adventurer*.

In addition to *The Adventurer's* regular features, you'll find information about **X-Wing vs. TIE Fighter**, hints and tips for **Afterlife** and updates on LucasArts' next generation console games for Sony PlayStation and Sega Saturn. Finally, you'll be taken on an exclusive behind-the-scenes tour of LucasArts' Internet website, where you'll find out the latest about the site's offerings, including **Yoda's Help Desk**, a new interactive technical support feature.

Happy Adventuring!

Meaner and more cunning than ever, the nefarious demon-pirate LeChuck returns from the dead to once again torment Guybrush Threepwood in the highly anticipated graphic adventure sequel, *The Curse of Monkey Island*, sailing in on Windows 95 in the first half of 1997. Salty humor, exotic locales and ghost pirates galore highlight this latest chapter of the award-winning, high-seas adventure series.

*The Curse of Monkey Island* is the rollicking third installment of the popular *Monkey Island* game series, which includes the award-winning *Secret of Monkey Island* and *Monkey Island 2: LeChuck's Revenge*. *Curse* finds Guybrush taking up dull blade and rapier wit against LeChuck to save Elaine Marley, his one true love, from being made into the evil pirate's demon bride.

Fans familiar with the side-splitting humor and outrageous characters that highlighted the first two *Monkey Island* games will find more of the same in *The Curse of Monkey Island*. As the game begins, the evil and wily buccaneer LeChuck is attempting to woo Elaine into becoming his undead bride. But, hoping to marry Elaine him-

self, Guybrush unknowingly slips onto her finger a cursed ring that turns her into a gold statue. He must find a way to remove the curse from Elaine, all the while battling innumerable scurvy-ridden villains and grog-guzzling pirates in an attempt to ultimately thwart LeChuck from carrying out his sinister plans.

"The previous *Monkey Island* games provided an incredibly fertile platform, especially from a visual standpoint," says Jonathan Ackley,

who along with co-project leader Larry Ahern, developed *Curse*. "*The Curse of Monkey Island* will include all of the elements that made the series great but with a highly stylized, hi-resolution look that could not have been accomplished before."

*The Curse of Monkey Island*, like all graphic adventures from LucasArts, challenges players to become integrally involved in the story by finding various objects and solving a variety of puzzles in order to finish the game. Through an intuitive interface players can pick up and use objects, examine each item collected in their inventory and talk to various characters throughout the game. E.S.C.

# Rebellion Is Upon Us

**LucasArts Introduces the First Real-Time Strategy Game Based on Star Wars**

by TOM BYRON

**W**hen you think of LucasArts and *Star Wars*, what comes to mind? Chances are you think of games like **Dark Forces**, **Rebel Assault**, **TIE Fighter** and **X-Wing**. To date, LucasArts has produced *Star Wars*-based titles primarily in the action and space-combat categories. But part of the advantage and the beauty of the *Star Wars* universe is the incredible latitude it gives LucasArts to develop a wide variety of games in different genres.

Which is precisely why LucasArts is creating **Rebellion**, the first strategy game based on the *Star Wars* universe.

"**Rebellion** is a game of real-time strategy and galactic domination. Players get to take the role of either the Rebel Alliance or the Galactic Empire," says Wayne Cline, the game's production manager at LucasArts. "The possibilities for a game like this are tremendous."

**Rebellion: The Star Wars Game of Galactic Domination** takes the *Star Wars* gaming universe in an entirely new direction. In a rich strategic environment, players are thrust into a grand battle for control of the known galaxy. **Rebellion** will be a single or two player game and will include network and modem play (for two players). It is scheduled for release in Spring 1997 initially for the Windows 95 (Pentium) platform and is being developed by Coolhand Interactive of Palo Alto, Calif.

"The *Star Wars* universe is a natural for a game like **Rebellion**," says Wayne. "When

Coolhand came to us with a really great idea for a strategy-based title, we just couldn't pass it up."

## Loyalty is the Key

Domination of the galaxy is the primary objective in **Rebellion** and it's a goal not easily attained. The universe is divided by sectors and systems (or planets) and can be tailored by size for longer or shorter sessions, from 100 to 200 systems (10 to 20 sectors of 10 systems each).

Digging a little deeper, **Rebellion** isn't just about domination.

"**Rebellion** is really about loyalty," explains Wayne. "Part of the way a player wins the game is by building a strong loyalty base of planets, which translates to control of the galaxy. Players can win a planet's loyalty through either diplomacy or force. It's a real balance. For instance, the use of force can be very effective, but you run the danger of having a resentful planet under your control. It's not hard for a resentful planet to shift its loyalties to the other side."

## Real-Time Play (Really)

Complex strategy games like **Rebellion** are often referred to as "turn-based," that is, Player 1 makes a move and then upon completion, Player 2 takes a turn. In the meantime, Player 1 has no choice but to sit and wait for Player 2 to finish the turn.

"**Rebellion** changes all that," says Wayne. "In the game, everything happens in real-time. Events occur whether the player is ready or not. There's no time to run and make a sandwich, because you're liable to come back and

find you've lost a planet. My advice is eat well before beginning a session."

## Gameplay: Two Major Components

**Rebellion** gameplay breaks down to two basic parts, strategic and tactical. The strategic component is where players make the majority of decisions, including manufacturing, resource management, fleet deployment and mission assignments. Players are updated on events by their "agents" (C-3PO for the **Rebellion** and IMP-22 for the Galactic Empire).

When two opposing fleets meet over the same system, the tactical component kicks in. This is a separate game element where players can take ships that have been deployed, join them in "task-forces" or "fighter squadrons," and assign orders or targets. All of this takes place in a real-time 3D engine that is moving

as soon as the battle is joined, so while the player is making decisions, so is the computer or opposing player.

"The strategy component of **Rebellion** is exciting, but the tactical side takes this game over the top," says Wayne. "The 3D engine is really spectacular, and gamers will be hard pressed to find anything like it in any other game."

## A Question of Character

**Rebellion** is heavily character driven. Each side has several characters at its disposal. To win the game, a number of missions must be assigned to achieve specific goals, such as diplomatic missions to sway a system's loyalty, sabotage missions to drop planetary defenses (allowing for bombardment), or rescue missions if a character has been captured. By assigning a character to a mission that comple-

ments his/her attributes, the chances of that mission succeeding increase.

For example, if a player wishes to send a diplomatic mission to a planet to convince it to be loyal to the **Rebellion**, assigning Mon Mothma, who is a diplomat and the leader of the Alliance, will greatly increase the chances of the mission succeeding. At the same time, it may also leave her vulnerable to capture, which would give the opponent one of its "win factors." Of course, the player may then mount a rescue mission.

"Characters are drawn from all over the *Star Wars* universe, from the films and novels" explains Wayne. "Players and fans should expect to make use of the talents of characters like Luke Skywalker, Han Solo, Darth Vader and Admiral Thrawn (from the Timothy Zahn novels)." There are 55 characters in all, 28 from the Rebel Alliance and 27 from the Galactic Empire.

## Credible Creators

**Rebellion** is being created by Coolhand Interactive, a games developer based in Palo Alto, Calif. Coolhand brings a real credibility to the **Rebellion** experience. The group is led by Doug Mogica, a veteran of the legendary strategy-game developer Three-Sixty Pacific and former head of Paramount Interactive. **Rebellion's**

director and main designer is Scott Witte, also a Three-Sixty alum, and the primary mind behind the AI in the classic game Harpoon II.

"Coolhand is a top-notch developer and, like LucasArts, a strong believer in quality," says Wayne. "Their experience in strategy-based games is exactly what we needed for **Rebellion**."

## A Little Something for Everyone

**Rebellion** promises a little something for everyone. Veteran gamers will spend hours vying for domination of the universe, while newcomers will feel welcome in an accessible and undemanding interface. And, of course, anyone who's ever been a fan will finally be able to fulfill the ultimate *Star Wars* fantasy: the chance to run the galaxy. **ESC**

# Heavenly Hints for Afterlife

## Some Frequently Asked Questions Get Answered

**Q**uestion: I can't make any money, it seems I'm always in the red. Can someone help me out here?

The only way to make a profit is to build slowly. You pay a lot of money for roads and demons and angels.

Just lay down 3x3 tiles for each color, one training center, one karma station, one gate, and one

topia. Then set your tempo to mortal plodding so you can respond quickly when you start to lose SOULS. SOULS will only leave when all of the buildings in a certain colored fate is full, or if your gates or Karma stations are full. You can look at the graphs to find out if they are close to being full, but don't build more until you start to lose SOULS. Smaller fate zones will force the buildings in those zones to evolve into better structures. You get more money per SOUL if you have better structures on your zones. The only way that the zones will evolve is if they are under at least moderately good (or bad if you are running Hell) vibes and you keep the structures on those zones balanced. If you ask Aria and Jasper, they will give you suggestions about what to do. If you are playing in easy mode and everything is properly balanced, you may start making money around year 1000.

Special Note: Don't worry about losing SOULS too much while the game is young. It may take 1500 years to become profitable, so don't panic.

**Q**uestion: Aria and Jasper keep telling me I need to balance. How do I do that?

There are two ways to balance. One is to do it manually. Hit pause, and then click on the Heaven or Hell symbols at the bottom of your remote control so you just see all the colors where your structures are laid out. Then use the magnifying lens on each structure to get the Microview window. Click on the icon of the scale in the window. You will see a bar at

the top. You need to move the slider so the bar is completely white, then your structure is balanced. Doing this is free of charge. An easier, but more expensive way of balancing is to use the Macro Manager. That's the green icon with the two "m"s on it. When you bring it up, you can click on the scale that's balanced, and then click on whatever color you

want, or all of the colors, and then click on the penny symbol at the bottom to balance.

**S**pecial Note: Unless you're playing in Difficult Mode, you probably don't have to worry about balancing your tiles for the first few hundred years.

**Q**uestion: Aria keeps mentioning that Heaven is not diverse. What does she mean?

The SOULs in Heaven like to mingle and visit SOULs in other reward structures. You need to make sure that one fate structure is not surrounded by the same color on any side. Usually if you put four different colored 3x3 squares together and then build a road all around them the SOULs will be happy.

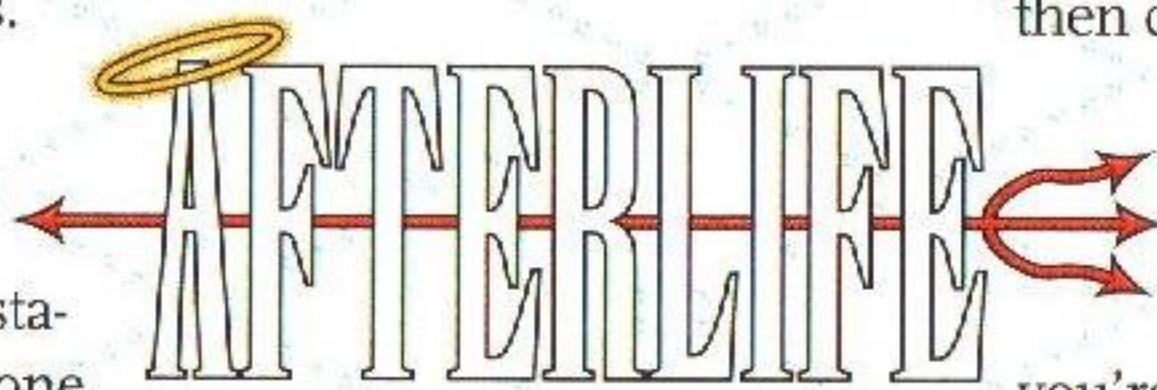

**Q**uestion: Help! I'm losing souls!!! What do I do?

Talk to Jasper and Aria. They will tell you why you are losing souls. When you first start a new game, set the tempo to Mortal Plodding so you have time to keep track of what the souls are doing. A lot of times you will get colored spikes which will tell you what color souls are leaving your Afterlife. They will also leave if your gates or karma stations are too full.

## Super Duper Special Hints

**T**he Money Cheat Type in \$@! at any point in the game to automatically receive an extra 10 million Pennies. You can do this up to five times in one game with no repercussions. Do it more than five times and you're in for a, shall we say, deathly surprise. No kidding.

**A Secret Fun Thing** At any point in the game, type SAMNMAX (all caps) three times in a row and see what happens. It's funny. Really. But save your game before you do it. Really. **ESC**

## New Titles for PlayStation and Saturn Will Release This Winter

by BARBARA GLEASON

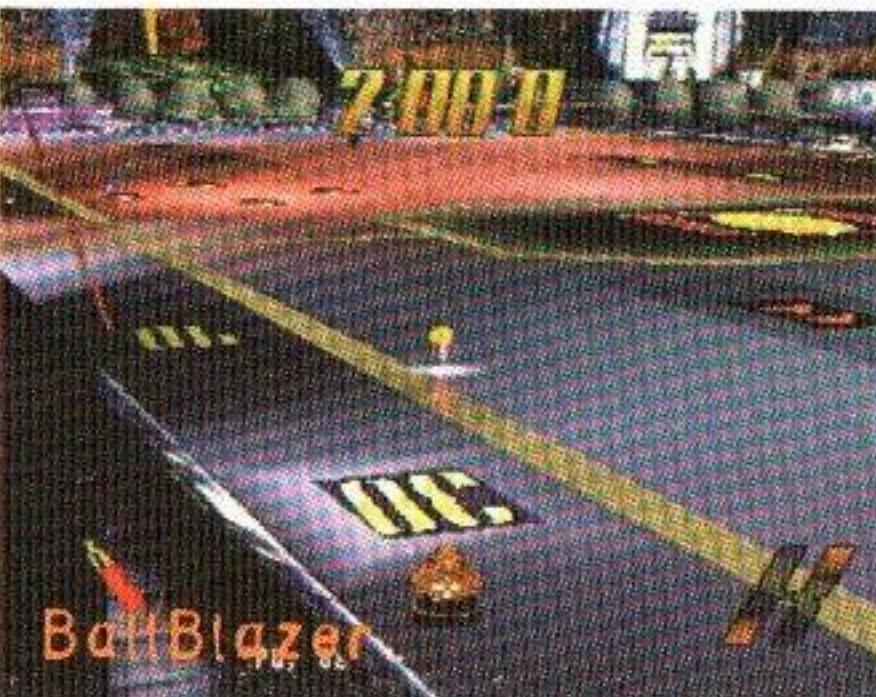

**Dark Forces** and **Rebel Assault II**, two of LucasArts' most popular PC CD-ROM games, will be launched this December for the Sony PlayStation. Both *Star Wars* titles will be customized versions, designed to take advantage of the PlayStation's unique 32-bit capabilities.

**Dark Forces**, winner of the Software Publisher's Association *Action Game of the Year*, will blow you away with its visceral blend of

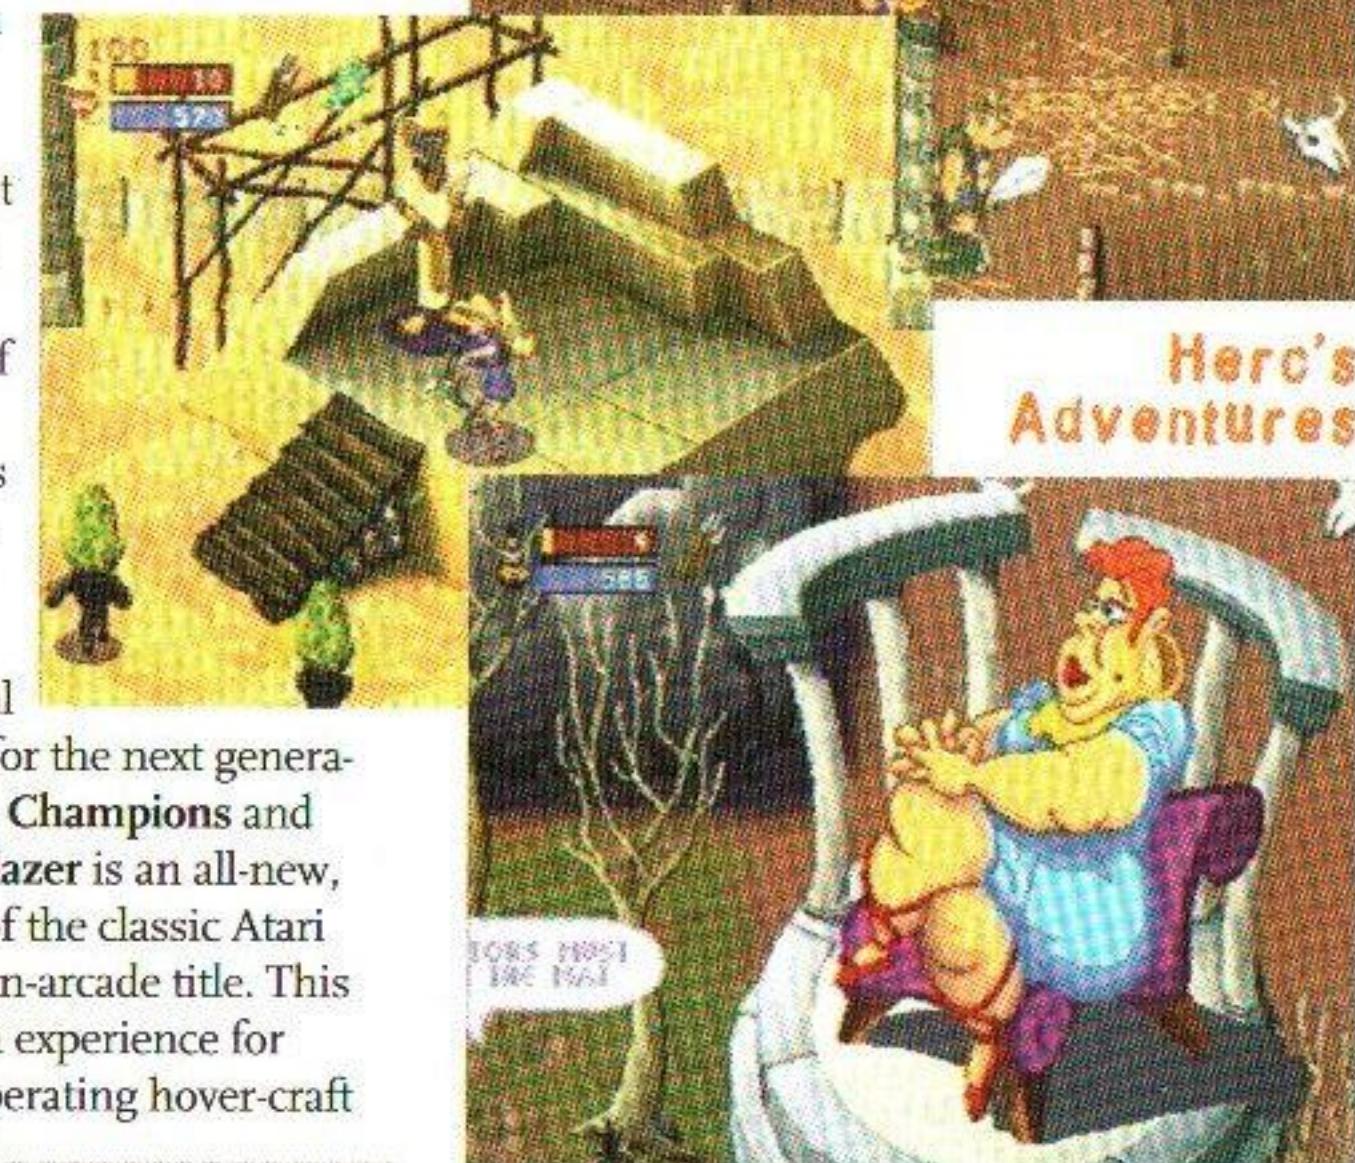

first person energy and adventure. This thrilling *Star Wars* story stars YOU as agent Kyle Katarn, sent out by the Rebel Alliance to search and destroy a terrifying army of dark troopers. Players navigate through complex and realistic environments, with an awesome arsenal of weapons, to face a multitude of familiar and new *Star Wars* adversaries.

**Rebel Assault II**'s fast-paced action set in the *Star Wars* universe garnered special praise from *USA TODAY* ("Another *Star Wars* triumph") and *Entertainment Weekly* ("This sequel goes galaxies beyond the original").

**Rebel II** features incredibly well-rendered 3D graphics and live action video - using actual props and costumes from the *Star Wars* trilogy. As Rookie One, you will call upon your skills in cockpit combat, flight maneuvering and blaster combat. You will pilot a number of *Star Wars* vehicles: starfighters, speeder bikes and a *Millennium Falcon*-class freighter.

Slated for release in early 1997 are two original titles specially developed for the next generation platforms: **BallBlazer Champions** and **Herc's Adventures**. **BallBlazer** is an all-new, entirely updated version of the classic Atari and Commodore 64 action-arcade title. This lightning fast, first-person experience for PlayStation has players operating hover-craft

**Herc's Adventures**

vehicles in a futuristic Rollerball-type competition. The objectives and playing field for each game vary, but they all require superior piloting and a strong stomach.

Ancient history turns into a virtual toga party in **Herc's Adventures**, a puzzle-oriented, RPG action adventure game. You embark on a quest to save Persephone from the evil clutch-

es of Hades, the god of the Underworld. Cartoony graphics and twisted humor keep the atmosphere at spoof level. Where else could you throw a house at an enemy? Or get defended by a small swarm of frogs? Or run from a flying saucer full of nasty, pyramid-building aliens? All of the classic mythological characters show up - Hera, Poseidon, the Minotaur and Medusa, to name a few. This unique title for Saturn and PlayStation represents a new adventure game style for LucasArts that players will love. **FSC**

BY JASON DEADRICH AKA, "WEBJEDI"

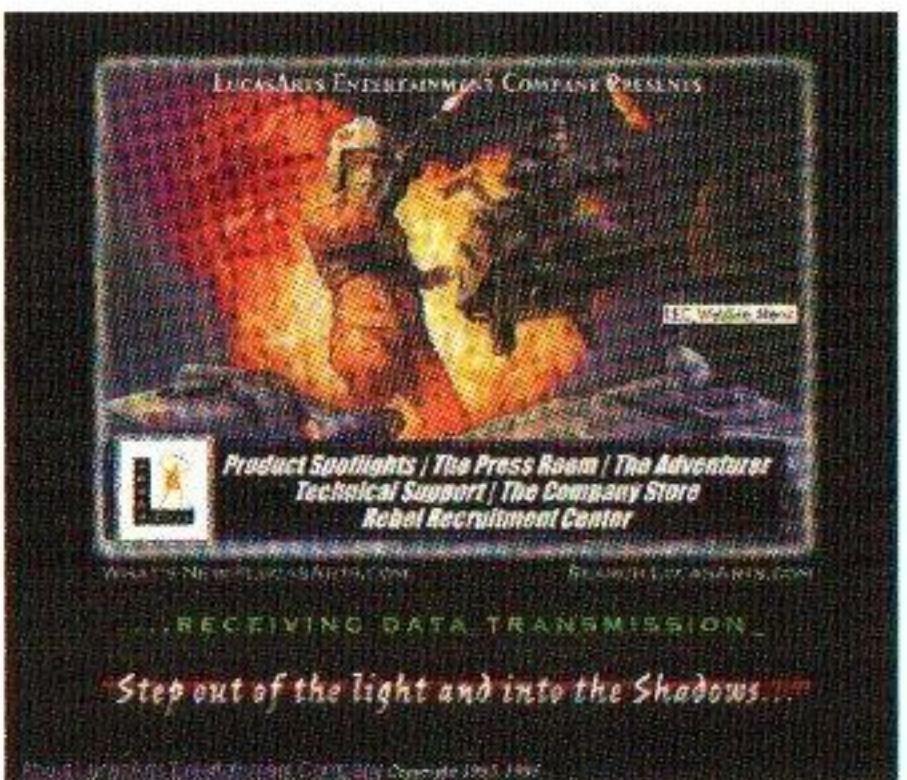

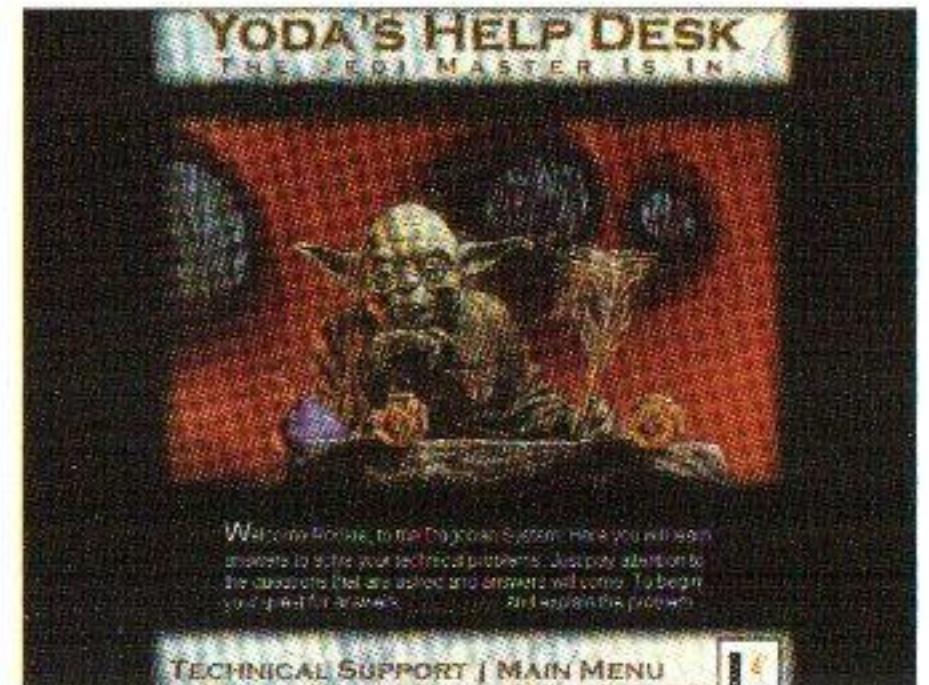

Hi-de-ho Websurfers!

In the last issue, I talked about how the LucasArts web is maintained (if you missed it, check the web site under "The Adventurer", issue #12). This time, I'll be taking you on a backlot tour of some of the hottest areas of the site and if we're lucky, we may even see some familiar faces along the way.

Now, let me grab my microphone and we'll start the tour...

"Ahem... testing... is this thing on? Welcome, Ladies and Gentleman to the LucasArts web site backlot tour. I'm Jason, your guide for this trip. You may recognize me from my late night infomercials, yuck, yuck. How is everyone enjoying their visit here at *The Adventurer*? Great! Glad to hear it. Before we begin the tour, let me remind everybody to please keep your arms and legs inside your web browser at all times. You never know when we may come across an angry hippopotamus out here. Great, now let's get this show on the road.

Over here on the right, you'll see the LucasArts web site main menu. From here, surfers from around the world can select an area of the site to visit. They can also choose to search the site or just see what's new. Below the menu, you'll often see links to cool areas of the site we like to highlight. It looks like *X-Wing vs. TIE Fighter* and *Shadows of the Empire* are appearing today. A little known fact; that's me wearing the flight suit in the role of Rookie One on the menu. Well, OK, not really. Let's continue...

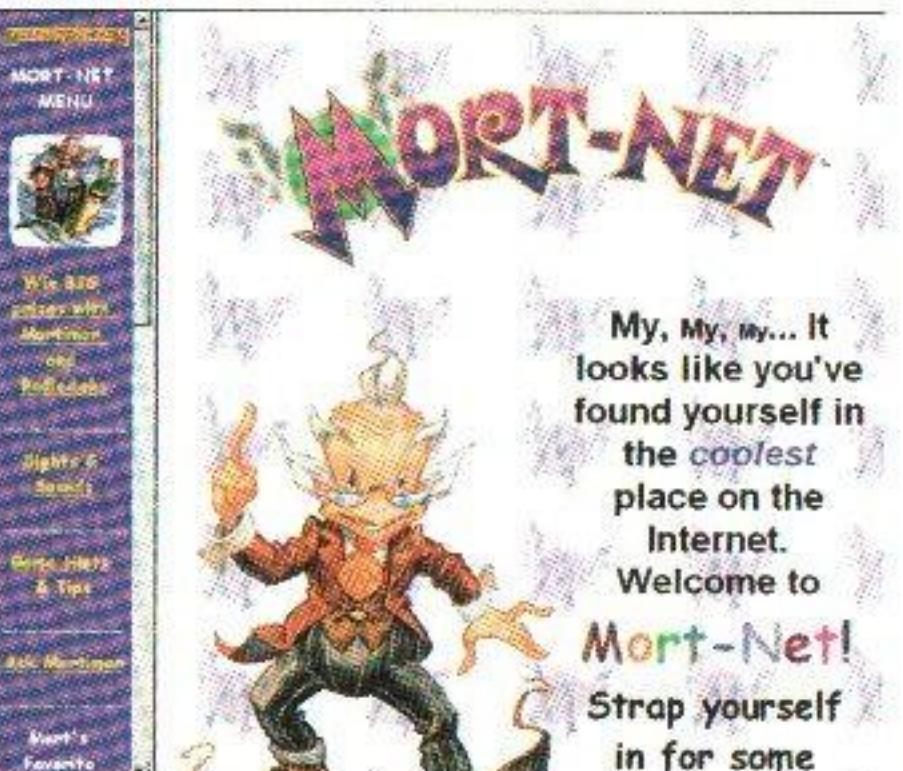

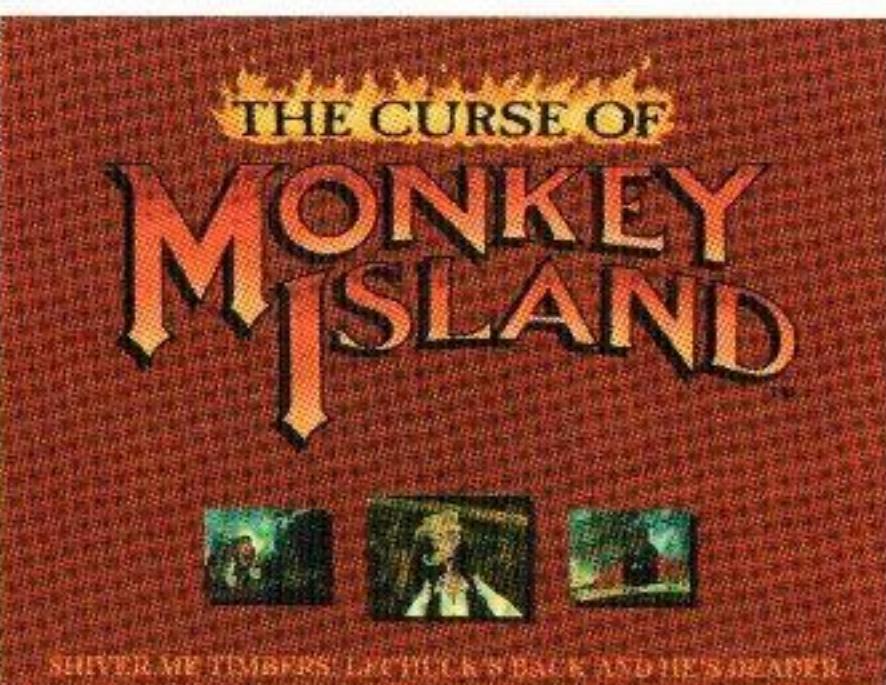

And now, coming up on the left side, you'll see none other than the Jedi Master, Yoda. As you can see, Yoda is preparing to answer a technical support question from his station at "Yoda's Help Desk" in the *Technical Support* area of the web site. We are happy to have Yoda here at the site and his knowledge is proving to be extremely helpful. Yoda is averaging over 5,000 answers a week. Yup, he's keeping busy, but if you have a technical support question, stop by and ask. You'll be amazed how easy it is. Everybody say, "Hi, Yoda!" Be sure to visit *The Company Store* souvenir shop on your way out for cool Yoda-related merchandise to remember your tour. Before we leave, here's an interesting fact: Did you know that Yoda is over 800 years old? He doesn't look a day over 500 to me!

Aye Maties! Git out yer eye patches and hooks, one of the most anticipated sequels is coming up next on the tour: *The Curse of Monkey Island*! All of your favorites have returned to the set to create a swash-buckling adventure like none other. Get those cameras ready, we may see some real celebrities as we pass through here. Look! There's Elaine, Guybrush and the evil LeChuck. For more details, stop by *The Curse of Monkey Island Product Spotlight*.

Folks, we're entering an extremely sensitive area. If the Empire finds out we got our hands on the *X-Wing vs. TIE Fighter Data Retrieval System*, we would be toast. Using this system, you can tap in to the Empire's computer to access the latest images, information and answers to frequently asked questions about the ultimate multiplayer space combat simulation game. Insiders tell us that soon you will be able to post high-scores and issue challenges to other pilots from this system. Let's just hope we can keep it a secret! Hey, who's that tall guy in the back with the black cape? Yeah, you...

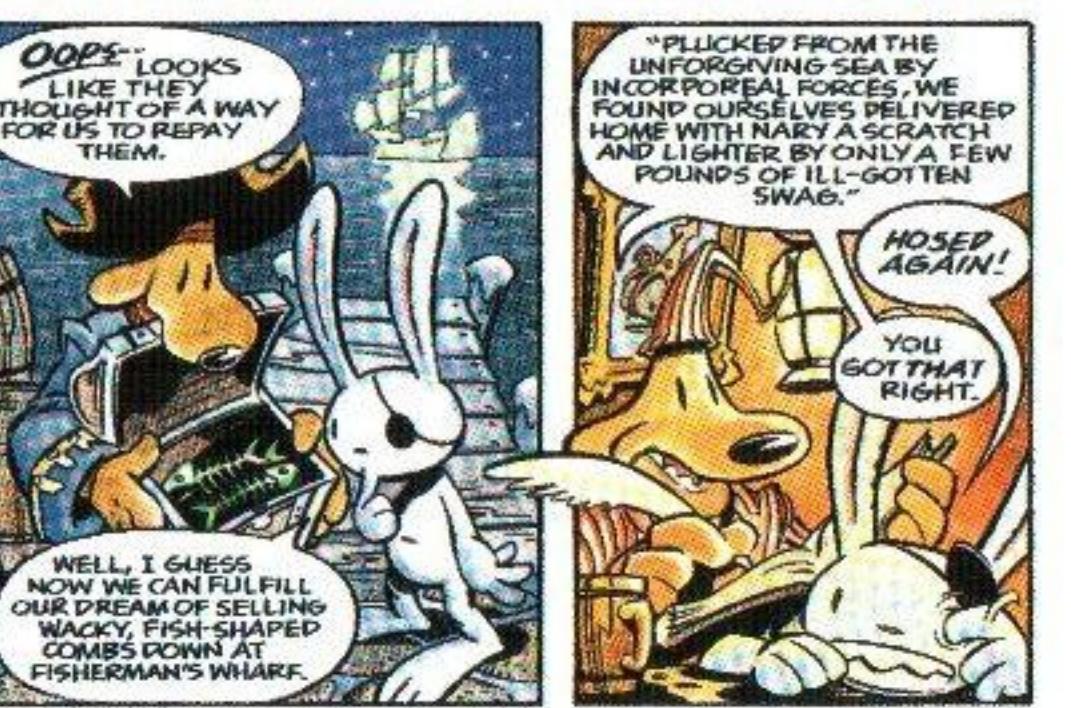

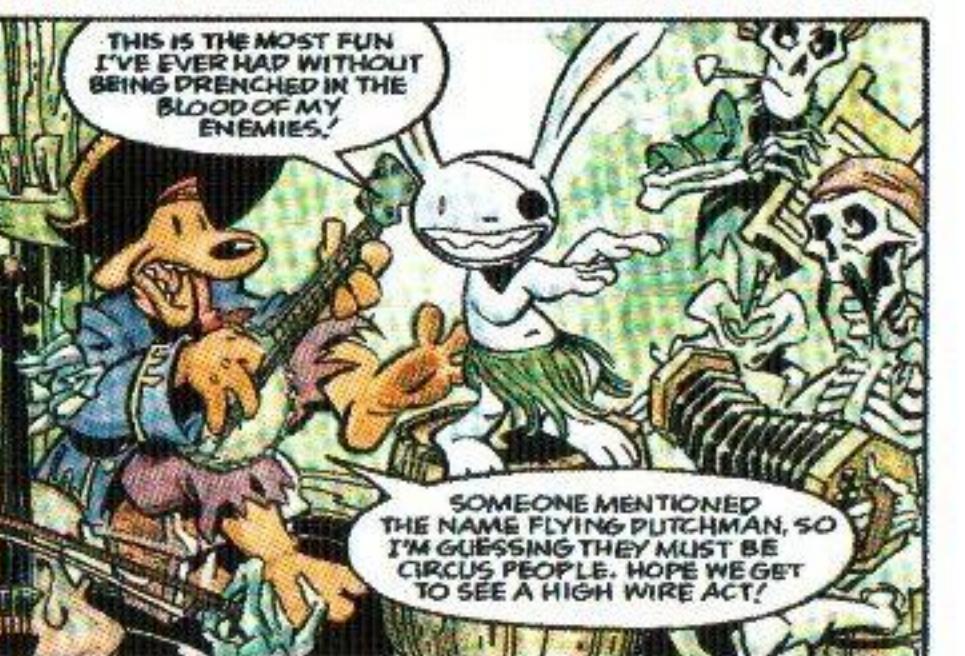

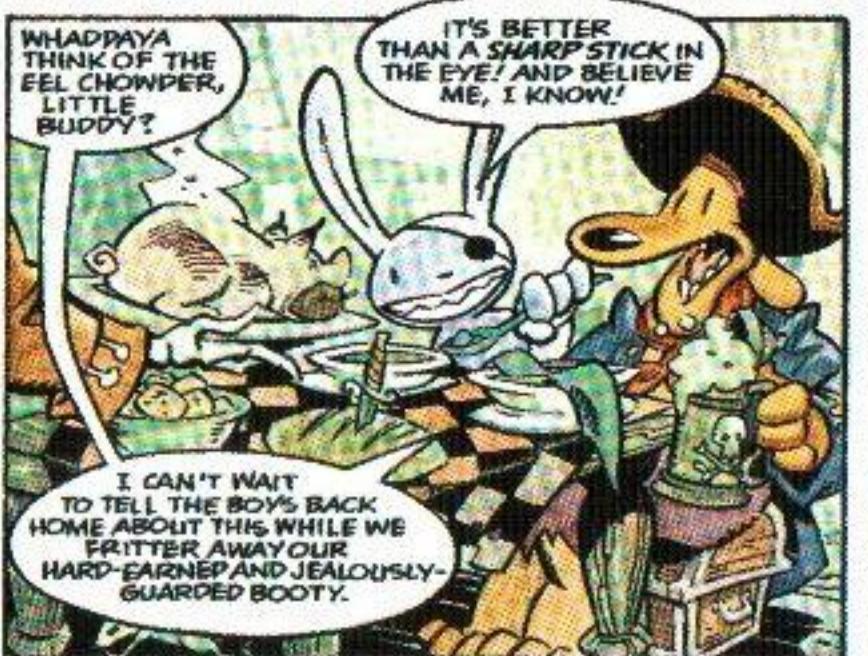

Casting off from Monkey Island, we find ourselves heading straight into Mort-Net, the coolest place online to hang out with a flying snail. Based on LucasArts' popular children's entertainment game, *Mortimer and the Riddles of the Medallion*, Mort-Net lets kids step into the world of Mortimer and his friends, Sid and Sally. With Coloring Books, Contests, Activity Pages and more on the way, Mort-Net is a blast! When I'm not giving backlot tours, you'll often find me slimesurfing with Mort."

THIS concludes our tour. I want to thank you for visiting and hope that you enjoy the rest of your day here at *The Adventurer*. Before you go, be sure to stop by *The Company Store*. From the latest CD-ROM games to Darth Vader boxer shorts (a personal favorite, by the way) they've got it all.

Thanks again. Until next time, keep those web browsers running and see 'ya on the net!

The ultimate battle between the Galactic Empire and the Rebel Alliance will be fought this winter with the release of **X-Wing vs. TIE Fighter**, LucasArts' first *Star Wars* multiplayer game.

**X-Wing vs. TIE Fighter** combines two of the most popular space combat simulations of all time, **X-Wing** and **TIE Fighter**, and engages players in ardent struggle over the fate of the universe. For the first time in a *Star Wars* game, combatants will be able to choose single or multiplayer mode, allowing as many as eight players to team up as a squadron or compete against each other via modem or local area network.

**X-Wing vs. TIE Fighter** offers players a choice of more than 25 original mission scenarios set in a variety of familiar *Star Wars* environments, ranging from asteroid and space junk fields to the Endor system, around which the Death Star battle in *Return of the Jedi* was fought. Players will have more than a dozen Rebel, Imperial and Pirate starfighters at their disposal, from which they can engage each other in assorted deep space dogfights.

Prior to each new mission in multiplayer mode, players determine whether they want to fly for the Rebel Alliance or the Galactic Empire. 3D inflight maps will be available in real-time to assist players in determining mis-

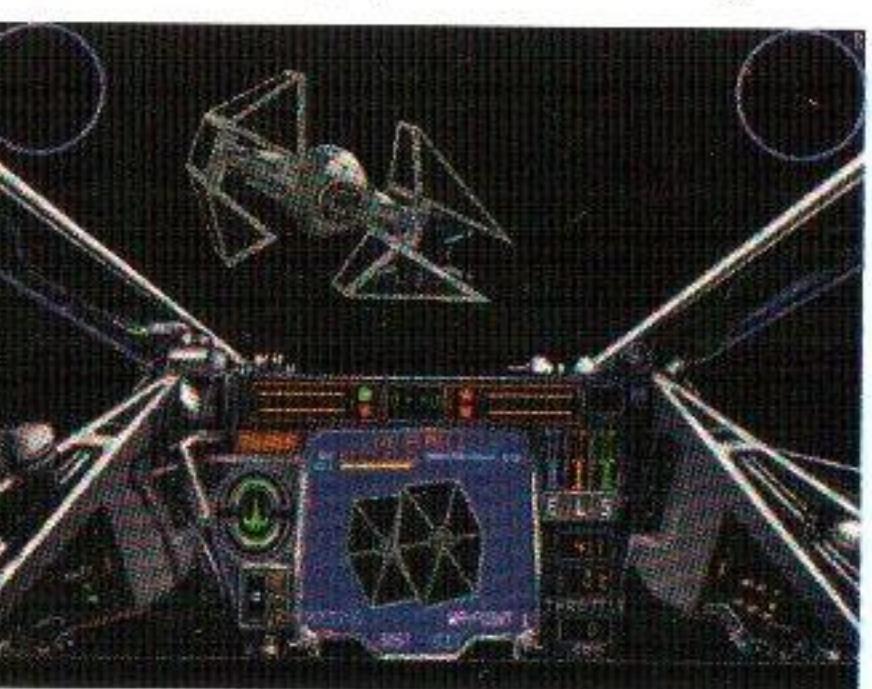

sion strategy as well as providing rendezvous points.

Once engaged in battle, players can assume the controls of a single starfighter or multiple craft. Squadrons are controlled by issuing tactical orders either through the 3D map or a series of keyboard commands. After a mission is completed, pilots are debriefed and scores are awarded according to the successes of each pilot.

While gameplay in single player mode is similar to that in multiplayer mode, **X-Wing vs. TIE Fighter** will have several missions specifically designed for single play. Players can choose between a series of conflicts fought by the Rebel Alliance or the Galactic Empire, ultimately enabling them to perfect various battle tactics that can be applied in multiplayer mode.

**X-Wing vs. TIE Fighter** features a fully upgraded version of the graphic engine used in previous **X-Wing** and **TIE Fighter** games. The engine will use new hi-res 16 bit texture-mapped models, with ship details taken directly from the *Star Wars* archives, allowing for the most realistic in-flight graphics to date in a *Star Wars* space combat experience.

**X-Wing vs. TIE Fighter** will enlist you in the fight of your life — because this time your enemies are real! **FSC**

**When did you start at LucasArts and what was the first project worked on?**

► I started in the Product Support Department at LucasArts in October 1991. My first project was a year later as an assistant programmer on **Sam and Max Hit the Road**.

**Tell us a little bit about what you're working on now.**

► I'm working on **The Curse of Monkey Island**! I loved the first two Monkey Island games and I'm thrilled to be working on the third one! It's going to be a lot of fun. We have a new technology for our hi-res graphics so the art is going to be spectacular. The story is clever and funny and we have an awesome team. That's all I'm going to say about it for now. You'll just have to see the demo on the LucasArts web site if you want to know any more!

**Tell us about your best LucasArts war story.**

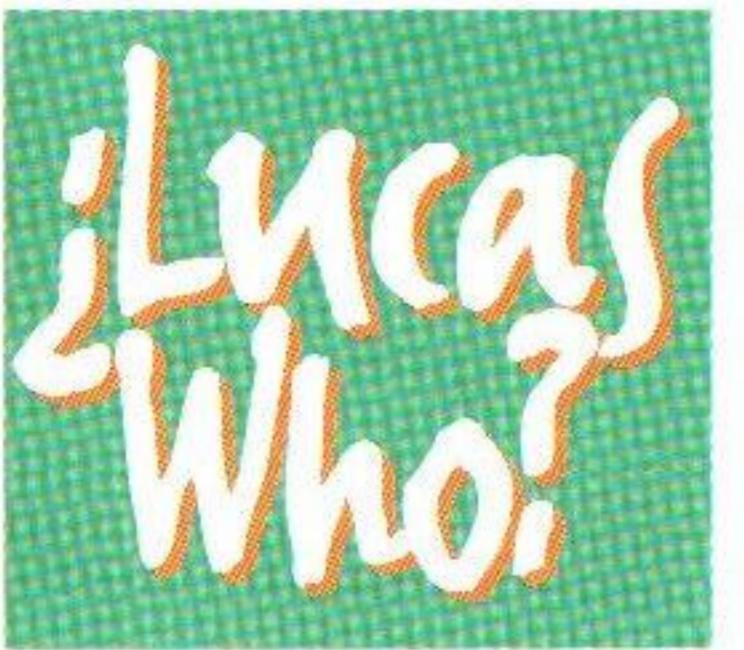

► Hmmmm....There's a couple that come to mind (several, actually). The last month of **The Dig** in general was pretty crazy. It's really a blur. I know we were there almost constantly, which is probably why I remember it as one long 720 hour day!

**If you could transport yourself into any LucasArts game what would it be and why?**

► That's a tough question if you think about it. It's sort of a tie between **Indiana Jones and the Fate of Atlantis** and **Mortimer and the Riddles of the Medallion** because I love adventure and archaeology. I've been interested since I was a kid looking for Indian artifacts with my friends on Mt. Tamalpais. In Mortimer, you get adventure trying to find the pieces of the medallion. Plus you can fly and save animals, which I think is really great!

**What is your favorite LucasArts game and why?**

► That's another tie. Partly **Sam and Max**

because they're so fun. How could you not have fun with them? They have such a strange sense of humor but are so cuddly! And partly **Indiana Jones and the Fate of Atlantis** because of its ground breaking cinematic vision and scope. Plus the sophistication of the game's three stories.

**Why did you choose a career in gaming?**

► I think I just lucked out and it chose me! If you hadn't chosen a career in gaming what would you be doing?

► That's hard to imagine. I know it would have to be something artistic or creative. I'm sure that after a few years of Cobol and JCL I'd probably start a ceramic studio and live on Ramen if need be.

**What do you do when you're not at work?**

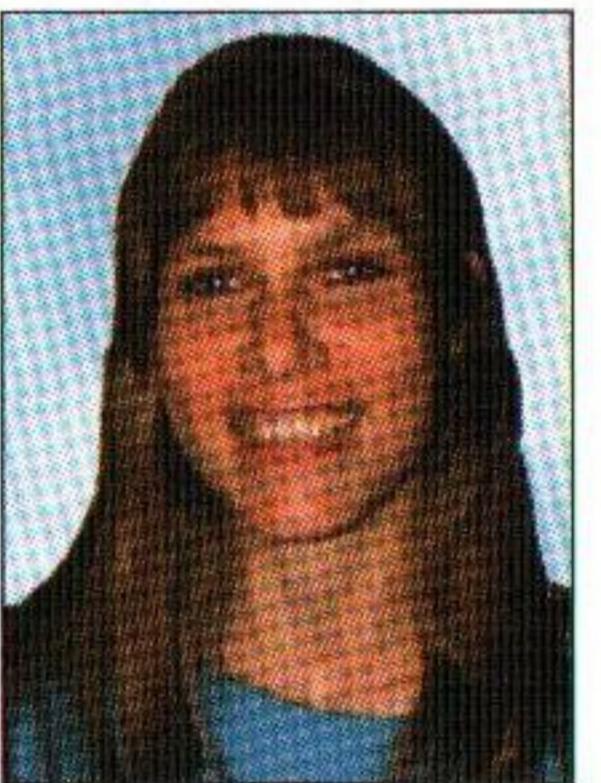

► I like to draw and listen to music. I also enjoy hiking and riding my motorcycle. Oh yeah, I never miss *Babylon 5* or *The X-Files*.

**What's your favorite vacation spot?**

► All over Northern California. My boyfriend and I take roadtrips on our bikes and stay at little inns or just camp. It's very relaxing. This summer I want to see Europe!

**Who are your heroes and why?**

► I think of a hero as someone who is perfect and bigger than life. I don't know anyone like that. But I have been influenced and inspired greatly by many of the people I work with. Probably the first person to really make an impact on me was my college music theory and jazz teacher, Doug Delaney. He really cared about his students and had a 100% commitment to teaching, plus he had his own music career. He taught me how to really work and concentrate. I also learned by his example. He practiced what he preached and that made a big impression on me. ESC

**When did you start at LucasArts and what was the first project on which you worked?**

► I started at LucasArts in March 1992. I worked on a couple of R&D projects but the first project I worked on was **The Dig**.

**Tell us a little bit about what you're working on now?**

► I'm Lead Programmer and Co-Designer of **Outlaws**. It's a cool game based on 1960's spaghetti westerns. It draws a lot of imagery and elements from the films of Sergio Leone. You might say it's an homage to his movies.

**Tell us your best LucasArts "war story."**

► That has to be **Full Throttle's Mine Road section**. It provided quite a coding challenge. In order to add that style of game play, we had to take the SCUMM story game engine and the video engine from **Rebel Assault**, then cram them together and try to make them play nicely with each other. Every morning for the last three weeks of the project, I would come in and find that our testing department had left the Mine Road running all night, thereby discovering new crash bugs over which to pull my hair out!

**If you could transport yourself into a LucasArts game, which one would it be and why?**

► **Monkey Island**. The pirate milieu is a blast. It has heroes, heroines, swashbuckling raiders, big guns and lots of action. I try to make sure that every time I go to Disneyland I ride *The Pirates of the Caribbean* at least half a dozen times! **Monkey Island** takes what's fun about pirates and adds an incredible sense of humor.

**What is your favorite LucasArts game and why?**

► **Full Throttle**, the last game I worked on. Ben is a majestic character with complex, suppressed emotions and a deep ambivalence towards the world around him. The artistic style is really spiffy, too. Being biased however, I'd also have to say **Outlaws**.

**Why did you choose a career in gaming?**

► I have a degree in Systems Program-

ming, but I couldn't see myself working at a 9 to 5 job for some defense contractor. A lot of my classmates ended up doing that. During college I had worked as a contract theater lighting and sound designer, so when I heard about a position as a game programmer at LucasArts, I thought "Great! Here's a job where I can take what I like from computers, and mix it with my creative, theatrical side." **If you hadn't chosen a career in gaming, what would you be doing?**

► Probably theater lighting & sound design.

**What do you do when you're not at work?**

► Since I spend a lot of time inside at work, I enjoy getting outdoors whenever I can, usually hiking, camping, skiing, biking, or gardening. I also enjoy doing carpentry, plumbing, electrical work, and other home improvements. (Needless to say, I try not to even look at a computer at home!) **What is your favorite vacation spot?**

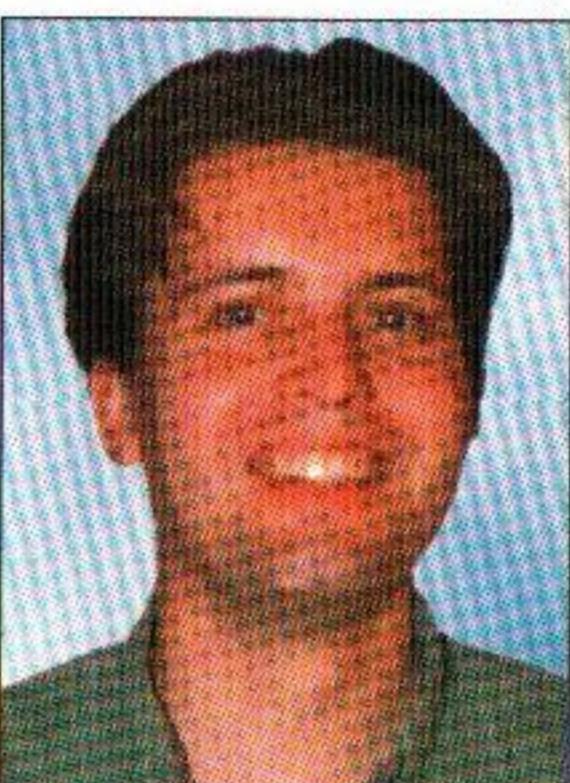

► The British Virgin Islands, specifically Tortola. Last time I was there it was an incredibly laid back island setting: No commercialization, friendly people, phenomenal scuba diving and gorgeous sunsets!

**Who are your heroes and why?**

► Dr. Roger Lessman, one of my primary professors at Tennessee Technological University. He was always open to a new way of solving problems, and he encouraged me to strive to find new, innovative solutions.

John Partyka, the Technical Director at the Cumberland County Playhouse. He would surmount terrific lighting and set challenges with limited budgets, time, and resources.

My father and my mother. I know it sounds hokey, but I want them and everyone else to know that I appreciate everything that they've done for me. While many parents may push their kids into a certain mold, my parents let me find my own "road." Without their support, I probably would not have made it to where I am today. ESC

**STEPHEN R. SHAW**

Programmer

**WHAT** you see is not always all you get, especially in a computer game. Tucked away in a hidden world that few gameplayers ever discover could be an "easter egg," a secret, often humorous treasure placed within a game by a programmer. Easter eggs are a little-known programming tradition, amusing players lucky enough to find them since the advent of the first computer games.

Game programmers, like LucasArts' Sean Clark, often insert easter eggs into games both as an amusement to themselves and a bonus to players.

"Easter eggs are special messages, images, or sounds

hidden within a game," says Clark, project leader of LucasArts' best-selling graphic adventure, *The Dig*. "They have no specific function within a game other than to amuse players. But just like their real world counterparts, they serve as special 'treats' for those who are lucky enough to find them."

Easter eggs are often extremely well hidden and gameplayers usually only discover them through sheer luck and perseverance. "Back in the old days," quips Mike Stemmle, project leader on *Afterlife*, "some poor guy would pound on a keyboard for hours and hours until something cool happened, then he'd tell all of his friends on the Internet about his con-

quest." From there, word would quickly spread. Today, LucasArts will often publish easter eggs so that everyone can appreciate programmers' handiwork.

Fans of the award-winning *Star Wars* game, *Rebel Assault II: The Hidden Empire*, will find a treasure trove of easter eggs hidden within it. The eggs include various bloopers from the game's full motion video footage, the fall of a stormtrooper which was inspired by

Wile E. Coyote from the famed *Roadrunner* cartoon series, and a mode which displays alternate dialogue for the entire game.

A favorite easter egg from *Rebel Assault II* is the now infamous animated stormtrooper chorus line.

Here's how to find

it: After blasting all of the stormtroopers at the fourth and last encounter in level 12, hold down the keys 'a,' 'c,' and 't.' Continue to hold them down until the elevator doors close and the cut-scene begins.

Easter eggs provide a fascinating glimpse into the personalities of game designers. "Programmers create easter eggs as a way of personalizing their contributions to a game," says *Rebel Assault II* project leader, Vince Lee. "They insert messages and animations for the same reason homeowners might put their handprints into the wet concrete of a new driveway." **ESC**

**ED:** See page 6 for an *Afterlife* easter egg!

## COLLECT!

You still have a chance to own the most intriguing, limited edition Star Wars: The Empire Strikes Back lithographs ever made available.

These beautiful 12"H x 18"W lithographs are an art collector's dream. Each has been created from an original production painting by noted *Star Wars* artist Ralph McQuarrie. Just admiring them will inspire you to relive the heart-pounding thrills you experienced the first time you saw *The Empire Strikes Back*. Speaking of the famous movie, in the corner of each lithograph is an original film frame (showing a film scene) from an authentic 70mm *The Empire Strikes Back* movie print. Press the button, and the film frame lights up – revealing the artistry of master filmmaker George Lucas. These elegantly framed and matted pieces are sure to become the winning prize of any movie buff's – or *The Empire Strikes Back* enthusiast's – collection. Not only are the lithographs individually numbered, but they're also hand-signed by the artist, and include a certificate of authenticity. Each of these four lithographs is limited to an edition of only 2,500. After that – they're gone. We urge you to order immediately to ensure availability. Of course, true collectors of *The Empire Strikes Back* (ESB) will want to order all four. Each uses two AA batteries (not included).

# Saving the universe is difficult. But ordering is easy. You choose the way.

**Phone:** Call us toll-free at 1-800-98-LUCAS (1-800-985-8227), 24 hours a day, 7 days a week. Please have your credit card ready; your personal LucasArts Customer Service Rep. will need to speak to the person whose name appears on the credit card. We'll confirm availability of items and advise you of the delivery date of your order.

**Fax:** Send your completed order form via fax to 1-818-587-6629. If you encounter transmission problems, resend your fax after writing "DUPLICATE" on the top of your order form.

Phone and fax orders must be purchased with Visa, MasterCard or Discover.

**Mail:** Checks should be in U.S. dollar amounts only (bank drafts from U.S. banks and postal money orders also will be accepted via mail). Mail your completed order form in the attached envelope to: LucasArts Company Store; P.O. Box 9367; Canoga Park, CA 91309-0367. Please do not send cash.

**Every order is guaranteed:** We know you'll be satisfied with your LucasArts Company Store purchase. But if you're not — whatever the reason — simply return your unopened or unused merchandise to LucasArts Company Store, 8130 Remmet Ave., Canoga Park, CA 91304, within 30 days to receive a prompt and friendly exchange or refund. (VHS videos, Laser Discs and Audio Compact Discs are limited to exchange only; sorry, no refunds.) Check refunds: please allow 4-6 weeks for processing.

**Customer Service:** For information about an order that has been placed already, just call us at 1-800-985-8227, Monday - Friday, 8:00 am to 5:00 pm Pacific Time.

**Prices:** Prices in this catalog are valid through February 28, 1997. However, prices may be subject to change without notice. You will be notified at the time of your order if pricing has changed. Items are subject to availability. Quantities are limited to stock on hand.

**Shipping & Handling:** Most orders are shipped via 2-day delivery at NO ADDITIONAL CHARGE. You can expect your order usually within 5 business days. Please include your daytime phone number and street address. P.O. Box orders will be shipped via regular U.S. Mail and may take additional time to arrive. *Oversize items ship via UPS Ground Service.* Items ordered together are not always shipped together. See other side for shipping charges. These rates apply per delivery address. We regret that we cannot ship items outside the U.S. and Canada.

**Technical Support:** This number is for Technical assistance only. Sorry, hints will not be given out over the Technical Support line. You can reach our Technical Support dept. by calling 1-415-507-4545. We are available to help you Mon. - Thur., 8:30 am to 5:30 pm PST, and Friday, 8:30 am to 4:30 pm PST. Or fax us at 1-415-507-0300.

**Hint Line: U.S.** — If you need a hint, you may call our automated Hint Line. This service costs 95¢ per minute, requires a touch-tone phone, and you must be at least 18 years old or have your parent's permission to call. The number is 1-900-740-JEDI (1-900-740-5334). The option to speak with a live Hint Operator is also available from this number. **Canada** — Our Hint Line is also available to our Canadian customers. This service costs \$1.25 (U.S.) per minute, requires a touch-tone phone, and you must be 18 years old or have your parent's permission to call. The number is 1-900-677-JEDI (1-900-677-5334).

Just say "Fett!"  
(The Bounty Hunter)

When an unnamed (during screen time) Boba Fett was introduced in *The Empire Strikes Back*, who knew he would become one of the most popular *Star Wars* characters? Today this ruthless, intergalactic bounty hunter has a following all his own. Clad in the fearsome armor of the Mandalore super commandos, Fett has modified his outfit to become a walking arsenal. Aided by his well-equipped starship, *Slave 1*, Fett is relentless as he tracks his prey. And, he figures prominently in the new *Shadows of the Empire* series.

**NEW! Discover the intrigue of Cloud City – waiting inside Fett's head!**

Enthusiasts won't believe the incredible details found inside our Boba Fett Transforming Play Set. Open his face up to reveal the world of Cloud City – complete with booby traps and mini-figurines for hours of play. Re-create your favorite scenes from *The Empire Strikes Back*! 6 3/4" H.

**16-016 Boba Fett Transforming Play Set \$22.95**

Did you know Boba Fett is a relentless bounty hunter who has worked for numerous individuals, including Jabba the Hutt and Darth Vader? It's true!

## BOBA FETT: Meet the fiercest of bounty hunters.

**NEW! Study Slave 1 up close.**

Don't tell Boba Fett, but Kenner has re-created his fearsome starship, *Slave 1*, down to the last detail. Rotate the blaster cannons to zero in on attacking ships, and open the cargo door to discover Han Solo frozen in carbonite. Measuring approximately 13" L in diameter, this amazing collectible features details that won't be believed – and it easily holds any Kenner action figure sold in LucasArts Company Store (see pages 2, 18, 20 and 21).

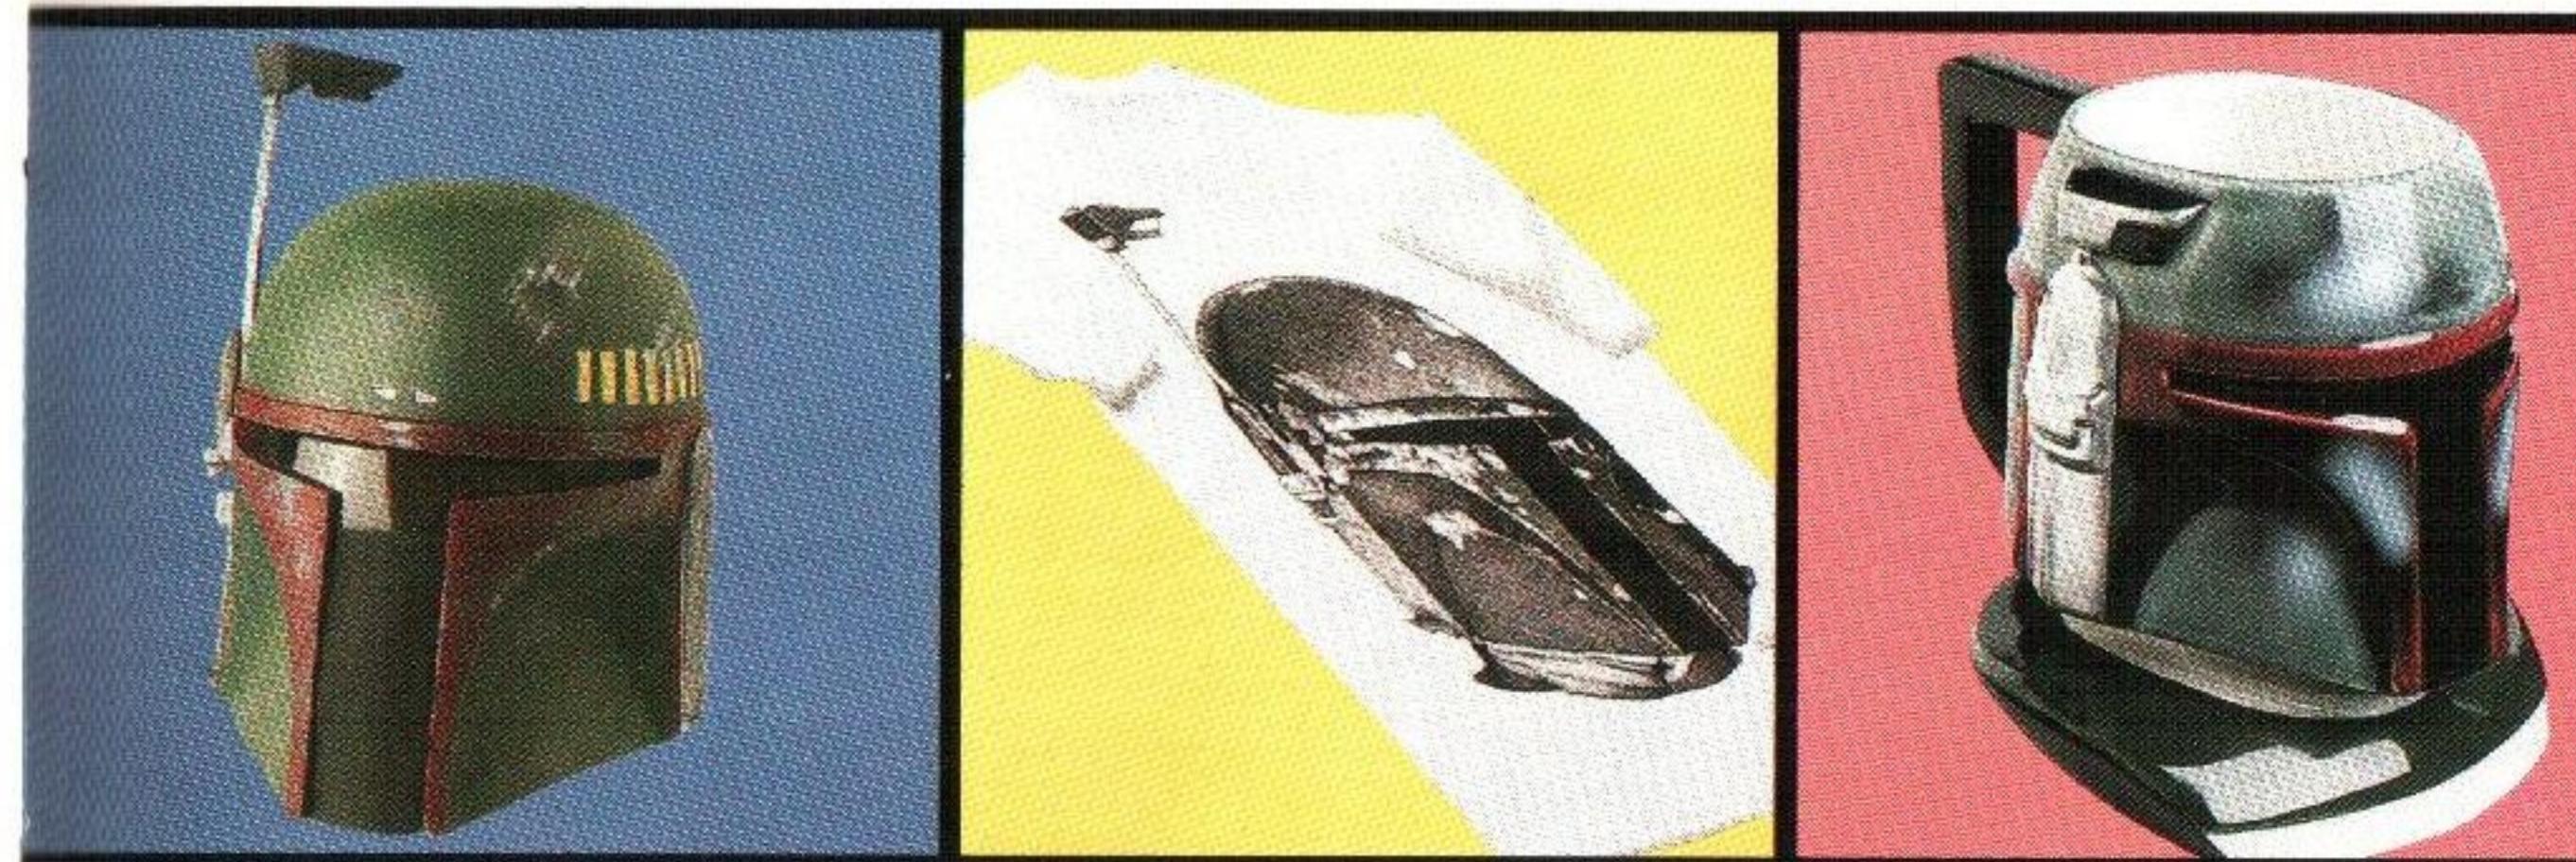

**02-034 Slave 1 \$44.95**

**NEW! This Boba Fett comic practically has a life of its own.**

You're eyes aren't playing tricks on you. This book features intriguing three-dimensional pop-ups that "come alive" as you turn from page to page. Follow the adventures of the notorious bounty hunter as he plots a course of relentless destruction and adventure. Full-color, 12 pages. 7" x 10 1/2".

by John Alvin. **\$250.00**

## **ALL-NEW**

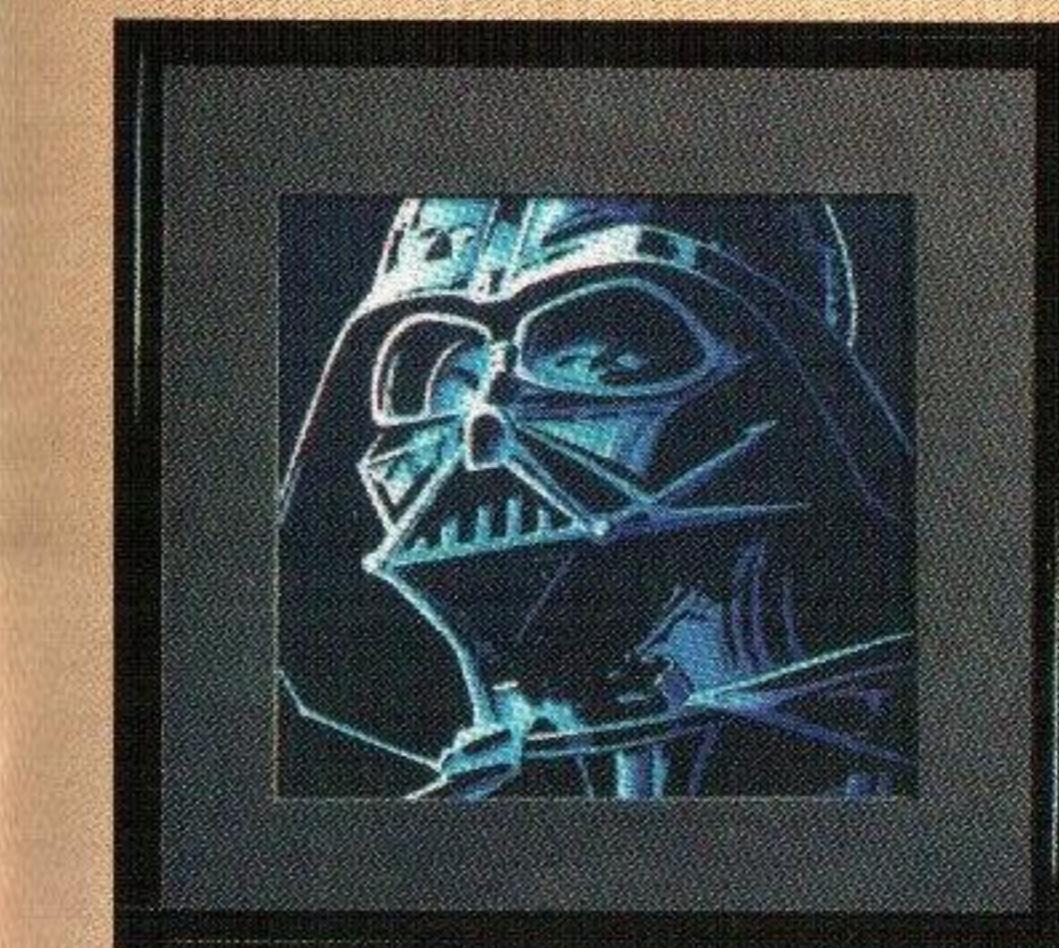

**NEW!** Unique lithographs that capture the magic, the drama, the intrigue of the greatest film trilogy of all time.

Fresh from the Star Wars vaults housing the original artwork, these all-new, limited-edition lithographs celebrate the award-winning art of Star Wars like no other lithographs have before them. What's more, each has been hand-signed and numbered — guaranteeing you a place in art collector's history. The "International Video Box Key Art" lithograph features three pieces of artwork by renowned Hollywood designer and artist John Alvin, who has captured the excitement of the trilogy in three inspired illustrations. Only 2,500 lithos have been created, and once they're gone, they're gone.

It measures 19" x 31" and arrives elegantly framed and matted for instant display. Also framed and matted are the 29" x 29" modern-art lithos, "Luke" and "Vader." Each of these has been limited to an edition of only 500 and arrives with a certificate of authenticity. Created from the original cells that appeared in the famous *LA Times Star Wars* comic anthology, artist Al Williamson has brought a depth and dimension to characters who will live on in movie immortality forever. Each of these limited-edition lithos will be the hallmark of any collection and makes the ultimate gift for any trilogy or modern-art fan. And, of course, true *Star Wars* aficionados will want to own all three.
